

Tak-Sung Heo

CONTACT INFORMATION	77, Seongsin-ro, Deogyang-gu, Goyang-si, Gyeonggi-do, 10483 Republic of Korea	MILITARY SERVICE	2014.07.15. ~ 2016.04.14. Army Sergeant, Honorable Discharge
DATE OF BIRTH	1994.02.21.	E-MAIL	gjxkrtjd221@gmail.com
PHONE	(+82)-10-3997-4664	GITHUB	https://github.com/HeoTaksung
COMPANY	NHN Diquet (2021.02.01 ~), NLP AI Researcher		

INTERESTS Interested in Natural Language Processing, Biomedical Natural Language Processing, and Deep Learning, especially about Natural Language Understanding.

EDUCATION **Hallym University**, Chuncheon-si, Gangwon-do, Republic of Korea **Mar. 2019 – Feb. 2021**
Department of Convergence Software
Master of Science (CGPA: 4.25/4.5)
Advisor: Professor Yu-Seop Kim
Research Area: Natural Language Processing, Biomedical Natural Language Processing and Deep Learning

Hallym University, Chuncheon-si, Gangwon-do, Republic of Korea **Mar. 2013 – Feb. 2019**
Major Department of Life Science and Double Major Department of Convergence Software
Bachelor of Science (CGPA: 3.53/4.5)

EXPERIENCED TASK

- Document/Sentence Classification
- Dialogue State Tracking
- Sentence Similarity Measuring
- Sentiment Analysis
- Topic Change Detection

CAREER **NHN DIQUEST** **Feb.2021 ~**
• Performance of research papers related to assignments **Feb.2021 ~ Dec.2021**
Aim: Achievement of research performance target
- Paper performance of “Development of data augmentation technology by using heterogeneous information and data fusion”
- Paper performance of “Development of deep tagging and 2D virtual try on for fashion online channels to provide mixed reality visualized service based on fashion attributes”

• Write a research proposal **Jan.2022 ~ Feb.2022**
Aim: Write a proposal for an project implementation plan for building data for AI training
- Writing and selecting “large-scale OCR data building” proposal

• Development of Self-detection Technology for Online Grooming in Social Networks **Apr.2022 ~ [Dec.2024]**
Aim: Development of online grooming detection intelligence to understand the semantics of media services of SNS and chatting apps
- Establishment and distribution of guidelines for data building related to online grooming
- Training for cloud worker to build online grooming data and Conducting of data quality inspection
- Building of Pre-trained Language Model specialized for online grooming (KConvo-RoBERTa)
- Development of deep learning model for online grooming semantic analysis

PROJECTS	<ul style="list-style-type: none"> Building language resources and developing deep learning/natural language processing for automatic language disorder diagnosis Apr.2019 ~ Feb.2021 Aim: Automating language analysis using conversation data from early childhood through high school. Role: Used LDA and Sent2Vec to automate topic change detection, which is one of the methods of measuring the development of conversational ability. Development of an automatic prognosis prediction system for cerebral infarction through natural language processing based on deep learning Jan.2019 ~ Feb.2021 Aim: Development of a deep learning algorithm that can predict important clinical outcomes using text from electronic medical records. Role: Applied a deep learning algorithm (CNN, LSTM, BERT) to the text of electronic medical record. Reliability and validity verification of automatic evaluation of machine translation and application to the evaluation of human translation Jan.2019 ~ Jun.2019 Aim: Establishing a system to verify the reliability and validity of automatic translation evaluation. Role: Direct implementation of BLEU and METEOR, the metrics for evaluating the quality of machine translation.
AWARDS	<ul style="list-style-type: none"> Excellence Award at KSC 2019 Undergraduate/Junior Paper Contest (2019) Korean Institute of Information Scientists and Engineers (KIISE) 2018 SW WEEK Contest Code Ground Gold Award (2018) – 1st place Hallym University, Chuncheon-si, Gangwon-do, Republic of Korea
SKILLS	<ul style="list-style-type: none"> Language: Python, Java Frameworks: TensorFlow, Keras Others: Pycharm, Jupyter notebook

SUMMARY

Tak-Sung Heo is a research and development engineer specializing in natural language processing. He has a particular interest in automating various problems through natural language understanding and wishes to develop and enhance natural language processing models' performance. He has conducted research in various fields, including text classification, dialogue state tracking, disease prediction, estimation of conversational ability development, sentence similarity evaluation, and data augmentation, using text data. Through his extensive research experience, he believes that he can identify crucial points when solving new problems and has the ability to quickly explore and decide on methods to address them, thus possessing numerous advantages.
